

SUMMARY

Software Engineer with 2.5+ years of experience specializing in **React Native, React.js, and TypeScript**. Expert at turning complex product requirements into scalable features. Shipped a consumer app with **500k+ downloads**, optimized deployments via OTA updates, and engineered a JSON-driven library that **slashed feature build times by 50%**.

SKILLS

TypeScript | JavaScript (ES6+) | SQL | HTML5 | CSS3 | Tailwind CSS | Material UI | Shadcn | React.js | React Native | Next.js | Redux | Redux Toolkit | TanStack Query | Express.js | Node.js | Microservices | REST APIs | WebSockets | PostgreSQL | MongoDB | SSO (OIDC/OAuth 2.0) | JWT | Azure (DevOps/Hosting) | Docker | CI/CD | Firebase | Mixpanel | Git | GitHub | Claude Code | Cursor | GitHub Copilot | AI Agents | Prompt Engineering | Postman | Effective Communication English , Hindi, Marathi - *All professional proficiency.*

PROFESSIONAL EXPERIENCE

Excellon Software, Pune

Associate Software Engineer Aug 2024 - Present

- Engineered **high-scale mobile solutions** for KTM India app, enhancing customer experience and stability.
- Designed a **schema-driven UI** using master configurations, reducing feature deployment time and ensuring design consistency.
- Optimized **frontend performance** via refined state management and rendering logic to eliminate UI lag.
- Integrated **real-time location workflows** using Google Maps and Firebase to improve field service efficiency.
- Managed **production deployments** on Azure, maintaining 99.9% uptime for enterprise automotive applications.

Excellon Software, Pune

Software Engineer Intern Jan 2024 - Jul 2024

- Developed **core transaction screens** and implemented complex business logic for the Bajaj service application.
- Built **reusable React Native components**, ensuring seamless data flow between backend and frontend layers.
- Collaborated on **real-time tracking features** and integrated analytics (Mixpanel/Google Analytics).

PROJECTS

Dealer Management Platform (iDMS Product)

Jan 2024 - Present

Multi-tenant platform used by Bajaj, Ather, and Ford for end-to-end service lifecycles.

- Engineered **Prizm**, a proprietary JSON-driven npm library with RBAC support, enabling the creation of dynamic interfaces and **increasing development velocity by 50%** across Sales, Inventory & Finance modules
- Architected **multi-tenant service modules** (Appointment, Estimates, JobCards) enabling rapid client onboarding with zero code changes
- Designed **dynamic workflows** and schema-driven forms to support diverse requirements for Bajaj, Ather, and Ford.

KTM India (React Native Application)

Dec 2024 - Present

Live on Play Store: 500k+ downloads

- Executed a **major framework upgrade** from React Native v0.69 to v0.73.8, significantly improving app stability and library compatibility.
- Implemented **Microsoft CodePush** for over-the-air (OTA) updates, enabling critical bug fixes without waiting for App Store/Play Store approval cycles.
- Built **core customer features**, including automated service booking, digital job cards, and real-time ride tracking workflows.
- Engineered a custom **communication bridge** to integrate the **KOGO community platform** (Native SDK), enabling seamless interaction between the React Native UI and native social features like automated storytelling and live ride feeds.
- Integrated **Firebase Cloud Messaging (FCM)** and analytics to drive user engagement and data-driven feature adoption.

EDUCATION

Pune University

Bachelor Of Engineering Jun 2022
