

SUMMARY

Result-driven **Full Stack Software Engineer** with ~2.5 years of experience specializing in **React.js, React Native, and TypeScript**. Expert in building scalable mobile solutions (500k+ downloads) and high-performance web apps using **SOLID principles and OOP**. Proven track record in full-stack development with Node.js and Azure, delivering production-ready features for the automotive industry.

SKILLS

Languages & Web: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3/Sass, Tailwind CSS, Material UI, Shadcn.
Frameworks & Libs: React.js, React Native, Next.js, Redux Toolkit, TanStack Query, Express.js, Node.js.
Backend & Security: Microservices, REST APIs, WebSockets, PostgreSQL, MongoDB, **SSO (OIDC/OAuth 2.0), JWT**.
Cloud & DevOps: Azure (DevOps/Hosting), Docker, CI/CD, Firebase, Mixpanel, Git, GitHub.
AI & Productivity: Claude Code, Cursor, GitHub Copilot, AI Agents, Prompt Engineering, Postman.
Languages: English, Hindi, Marathi (All Professional Proficiency)

PROFESSIONAL EXPERIENCE

- Excellon Software, Pune

Associate Software Engineer

Aug 2024 - Present

 - Engineered high-scale mobile solutions for KTM India (500k+ downloads), enhancing customer experience and stability.
 - Designed a schema-driven UI using master configurations, reducing feature deployment time and ensuring design consistency.
 - Optimized frontend performance via refined state management and rendering logic to eliminate UI lag.
 - Integrated real-time location workflows using Google Maps and Firebase to improve field service efficiency.
 - Managed production deployments on Azure, maintaining 99.9% uptime for enterprise automotive applications.
- Excellon Software, Pune

Software Engineer Intern

Jan 2024 - Jul 2024

 - Developed core transaction screens and implemented complex business logic for the Bajaj service application.
 - Built reusable React Native components, ensuring seamless data flow between backend and frontend layers.
 - Collaborated on real-time tracking features and integrated analytics (Mixpanel/Google Analytics).

PROJECTS

- Dealer Management Platform (iDMS Product)

Multi-tenant platform used by Bajaj, Ather, and Ford for end-to-end service lifecycles.

Jan 2024 - Present

 - Engineered **Prizm**, a proprietary JSON-driven npm library with RBAC support, increasing development velocity by 50% across Sales and Finance modules. to build dynamic interfaces, **increasing development velocity by 40–50%**.
 - Architected multi-tenant service modules (Appointment ,Estimates ,JobCards) enabling rapid client onboarding with zero code changes
 - Designed dynamic workflows and schema-driven forms to support diverse requirements for Bajaj, Ather, and Ford.
- KTM India (React Native Application)

Live on Play Store: 500k+ downloads

Dec 2024 - Jan 2025

 - Executed a major framework upgrade from React Native v0.69 to v0.73.8, significantly improving app stability and library compatibility.
 - Implemented Microsoft CodePush for over-the-air (OTA) updates, enabling critical bug fixes without waiting for App Store/Play Store approval cycles.
 - Built core customer features, including automated service booking, digital job cards, and real-time ride tracking workflows.
 - Integrated Firebase Cloud Messaging (FCM) and analytics to drive user engagement and data-driven feature adoption.

EDUCATION

Pune University

Bachelor Of Engineering
